To Whom It May Concern:

It is with great pleasure that I write this letter of support for Cathy Marie George.

Cathy George would be a worthy recipient as having identified a significant clinical need in Newfoundland and Labrador some 20 years ago. Based on this knowledge and having researched the situation Ms. George then proceeded to develop electrolysis services which has served the people of St. John's and surrounding areas for the past 20 years and most recently a second facility has opened on the Island's west coast in Corner Brook, Newfoundland and Labrador.

Back in the early 90s when Ms. George and I first discussed the situation, it occurred to her that the need for an excellent electrolysis facility was great and by developing such a clinic, she would have the opportunity to help many patients as well as develop a very significant and rewarding business.

With hard work and a strong entrepreneurial spirit, Cathy over the past 20 years has not only developed two successful electrolysis clinics, but went on to teach electrolysis at one of the local post secondary educational facilities. She now employs three of her students in her St. John's clinic. She has also completed post graduate training and has obtained an adult education certificate.

It is without hesitation that I support Cathy's nomination as she is very deserving of such an award which would recognize her significant contribution to enhance the lives of so many people over the past 20 years.

Kindest regards,

A handwritten signature in black ink, appearing to be "W. Gulliver".
